PROJECTS

MedSure: Blockchain-based Medicines tracking Syatem
Self-Learning Project

📅 January 2023 – Present

- Utilized Ethereum-based smart contracts to automate the tracking and verification of medicine supply chain transactions.
- Used HTML,CSS, Javascript for Front-end.
- Also Developed Arduino-based temperature and Humidity Sensor

The Dojo: Project Management Site
Self-Learning Project

📅 October 2018 – November 2018

- Implemented management of projects like attacking, defense, scouting, etc. for anime verse.
- Utilized React, a popular JavaScript library, to build a responsive and user-friendly interface for The Dojo.
- Leveraged Firebase, a powerful backend-as-a-service platform, to handle user authentication, data storage, and real-time updates.

Youtube Clone
Self-Learning Project

📅 January 2019

- Developed a YouTube clone using ReactJS, Sass, React Routers and ContextAPI.
- Successfully implemented features like video playback, search functionality, and user authentication.
- Deployed the application using Netlify, resulting in a functional and accessible YouTube-like experience.
